PROFESSIONAL PROFILE

Creative and driven Full-Stack Developer with experience building modern web and mobile applications using different languages and frameworks. Passionate about creating sleek, responsive, and user-focused digital experiences that combine functionality with modern design. Currently leading the development of Purple Safety, an innovative safety-focused application designed to deliver secure, scalable, and real-time digital solutions. Known for strong problem-solving skills, clean UI design, and the ability to quickly adapt to new technologies and collaborative environments.

CORE SKILLS

- Frontend: React, Vue.js, Flutter, HTML5, CSS3, JavaScript, TypeScript, Flutter
- Backend: Node.js, Python, PHP
- Databases: MySQL, Oracle SQL, Firebase
- Design: Figma, Canva, Figma
- Tools: GitHub, Vite, Oracle APEX, WordPress, Agile/Scrum

EXPERIENCE

Purple Safety – Full-Stack Developer & Product Designer

2026 – Present

Currently designing and developing Purple Safety, a modern safety-focused application with an emphasis on real-time functionality, intuitive user experience, and secure digital solutions. Leading UI/UX design, frontend architecture, and mobile responsiveness while building scalable application features.

LifeChoices Academy – Learnership

April 2025 – September 2025

Underwent an intensive full-time on-site training boot camp. Focused more on entirely technical upskilling, personal growth and professional to get ready for the workplace.

LifeChoices Academy – Studio Intern/Trainee

September 2025 – Present

Collaborated with agile teams to build responsive applications, improve user interfaces, and contribute to frontend and backend development projects.

PROJECT HIGHLIGHTS

- Location Finder App – Built a React & TypeScript web application with interactive maps, Supabase integration, and real-time location tracking.
- E-Commerce Platform – Developed a responsive e-commerce website using Vue.js and MySQL with modern UI design principles.
- Analytics Dashboard – Created a professional Oracle APEX dashboard with interactive charts and reporting features.
- Purple-Safety - (current) Created using Flutter and Firebase, built to minimize GBV in South Africa.
